U V O D

Izdavajući ovaj Adresar, Savezna trgovinska komora želi da zainteresovanim trgovačkim i poslovnim krugovima u inostranstvu pruži jedan praktičan priručnik, koji će im omogućiti da bolje upoznaju mnoštvo i vrste proizovoda koji su predmet jugoslovenske izvozne i uvozne trgovine, kao i pregled jugoslovenskih preduzeća ovlašćenih da se bave poslovima izvoza i uvoza.

Nomenklatura izvozno-uvoznih artikala sastavljena je na osnovu klasifikacije Medjunarodne trgovine preporučene od strane OUN, prilagodjene jugoslovenskim uslovima.

U pregledu izvozno-uvoznih artikala cifre na levoj strani označavaju broj artikla, dok cifre koje se nalaze na desnoj strani označavaju brojeve preduzeća koja se bave izvozom odnosno uvozom dotičnih artikala.

U pregledu izvozno-uvoznih preduzeća cifre na levoj strani označavaju broj preduzeća, dok cifre koje se nalaze na desnoj strani, odnose se na artikle koje dotično preduzeće izvozi odn. uvozi.

Ukoliko ovaj Adresar odgovori svojoj nameni, Savezna trgovinska komora radovaće se da je i na taj način doprinela unapredjenju i proširenju ekonomskih veza izmedju Jugoslavije i inostranstva, što pretstavlja jedan od njenih osnovnih ciljeva.

INTRODUCTION

Publishing this Directory the Federal Chamber of Commerce wishes to make available to the interested foreign business circles a practical hand book which will enable them to acquire a better knowledge of the numerous variety of products of the Yugoslav export and import trade, as well as a list of Yugoslav firms licensed to deal in the export and import business.

The nomenclature of the export and import commodities has been compiled in accordance with the International Trade Classification recommended by UNO and adapted to the Yugoslav conditions.

In the list of export and import commodities the numbers on the left side denote the reference numbers of the commodities and the numbers of the right handside the reference numbers of the export-import firms dealing in the exports or imports of such commodities.

In the list of export-import firms the numbers on the left handside denote the numbers of the firms and the figures on the right handside refer to the commodities exported or imported by such firms.

In case the Directory fulfils its object the Federal Chamber of Commerce will be glad to know that it has contributed to the development and expansion of economic relations between Yugoslavia and other countries which is, after all, one of its principal objectives.

INTRODUCTION

En éditant cet Annuaire, la Chambre de Commerce fédérale s'est inspirée surtout du désir de fournir aux milieux commerciaux mieux connaître le nombre et la variété des produits qui font l'objet du commerce d'exportation et d'importation de la Yougoslavie, ainsi qu'un répertoire des entreprises yougoslaves qui s'occupent d'exportation et d'importation.

La nomenclature des articles d'exportation et d'importation a été établie suivant la classification du Commerce international recommandée par l'ONU et adaptée aux conditions spécifiques da la Yougoslavie.

Au répertoire des articles d'exportation et d'importation, les chiffres du côté gauche marquent le numéro des articles, tandis que ceux du côté droit marquent le numéro des entreprises qui s'occupent de l'exportation ou de l'importation des dits articles.

Au répertoire des entreprises d'exportation et d'importation, les chiffres du côté gauche marquent le numéro des entreprises, cependant que les chiffres du côté droit se rapportent aux articles que l'entreprise en question exporte ou importe.

La Chambre de Commerce fédérale serait heureuse de savoir que cet Annuaire a répondu à sa destination, car elle aura ainsi contribué au développement et à l'extension des relations économiques entre la Yougoslavie et l'étranger qui comptent parmi les buts fondamentaux de son activité.

EINLEITUNG

Mit der Herausgabe dieses Adressenbuches verfolgte die Bundeshandelskammer den Zweck, den daran interessierten Geschäftskreisen im Auslande ein praktisches Nachschlagewerk zu bieten, welches es ermöglichen soll, die Menge und Vielfältigkeit der Artikel des jugoslavischen Ein-und Ausfuhrhandels, sowie die jugoslavischen Firmen kennen zu lernen, welche zu Ein-und Ausfuhrgeschäften ermächtigt sind.

Die fur die Ein-bezw. Ausfuhr in Betracht kommenden Waren sind unter Zugrundelegung der im internationalen Handel gültigen, seitens OUN empfohlenen und den jugoslavischen Verhältnissen angepassten Klassifikation zusammengestellt.

Die in der Übersicht auf der linken Seite stehenden Ziffern beziehen sich auf die Zahl jedes einzelnen Artikels, während die Ziffern auf der rechten Seite diejenigen Firmen bezeichnen, welche sich mit der Ein-und Ausfuhr der betreffenden Waren beschäftigen.

In der Übersicht der Ein-und Ausfuhrfirmen bedeuten die Ziffern auf der linken Seite die fortlaufende Nummer der Firma, während die Ziffern auf der rechten Seite diejenigen Waren bezeichnen, welche die betreffende Firma ein-bezw. ausführt.

Es kann mit Recht angenommen werden, dass dieses Adressenbuch seinen eingangs erwähnten Zweck erreichen wird und glaubt die Bundeshandelskammer ihrer Genugtuung darüber Ausdruck geben zu können, dass sie auch auf diese Weise zur Ausweitung und Vertiefung der Handelsbeziehungen Jugoslaviens mit dem Auslande beigetragen hat, womit eine ihrer grundlegenden Aufgaben erfüllt ist.

niku, ki je skalnat in poln snežišč. Z naše strani je dostop le iz Bovške kotline. Pogorje se razprostira od Predela do Učje, ki je ena najbolj samotnih gorskih dolin pri nas. Na italijanski strani Kanina je majhen ledenik. Vzhodno od Kanina leži v globini slovenska Rezija. Onstran dolin Reklanice in Jezernice se dvigata veličastni skupini Poliškega Špika (Montaža) in Viša.

Južno od Učje in Soče se vleče enolični sredogorski greben KOBARIŠKEGA STOLA. To predgorje je na južno stran čisto travnato. Tik pod vrhom Breškega Jalovca je najzahodnejša točka Jugoslavije. V kolenu Nadiže stoji obmejna MIJA, ki že kaže alpsko smer, medtem ko imata sosednja, prav tako mejna Matajur in Kolovrat že dinarsko smer. Na italijanski strani teh predgorij se razprostira naša draga, zatirana Beneška Slovenija.

PODZEMELJSKE JAME: Jama pod Babjim zobom (1h nad dolino Save Bohinjke), Zijalki pri zaselku Za Trato (nad Zg. Gorjami), Pokljuška luknja (pravzaprav naravno okno, 1h od Zg. Gorij), Zadlaška jama (nad sotočjem Tolminke in Zadlaščice, ½h od Tolmina), Pološka jama (blizu izvira Tolminke), Turjeva jama (pod Sv. Volarjem ob Nadiži, zah. od Kobarida), Jama v Molidniku (nad Robičem, zahodno od Kobarida), Jame nad Zadnjo Trento (pod Jalovcem).

NARAVNA OKNA: Prisojnikovo okno, Prestréljenikovo okno, Ravfenk v Ponci (zah. nad Planico).

VODOVJE

Iz Julijskih Alp tečejo Sava, Soča, Nadiža, Bela in Ziljica s svojimi pritoki. SAVA DOLINKA izvira pod Zadnjo Ponco v Planici kot Nadiža, zgine pod prodovi in se spet pokaže v Zelencih pod Ratečami. Z desne ji pritekajo Pišnica, Martuljek, Bistrica s Peričnikom in Radovna, ki prihaja skozi Vintgar iz Krme. Pri Mostah je Dolinka zajezena za novo hidrocentralo. SAVA BOHINJKA vre iz Komarče kot Savica, ki je podzemeljski odtok Triglávskih jezer. Ko zapušča Bohinjsko jezero, se ji pridruži Ribnica z Mostnico, dalje Bistrica. V soteski teče vanjo mnogo hudournikov. Iz Blejskega jezera dobiva Jezernico, pod Bodeščami se steka z Dolinko. Savski pritok je tudi SELŠČICA, ki se pri Škofji Loki zliva s Poljanščico.

SOČA ima kraški izvir pod Travnikom. Po ozki strugi dere skozi Trento in sprejema Zadnjico, Vrsnik in Lepenjo. V Bovški kotlini se ji pridruži Koritnica, ki dovaja tudi vode Predelice, Možnice in Bavšice in se pri Klužah zajeda globoko v tesni. Med belimi prodovi Bovške kotline dobiva pritoke Slatenik, Glijun in Boko, pri Žagi Učjo iz Beneške Slovenije. Več potokov ji priteka izpod Krna. Pod Tolminom se zliva vanjo Tolminka. Med Tolminom in Mostom na Soči (Sv. Lucija) zastaja v umetnem jezeru, da daje moč za hidrocentralo pri Doblarju. Višjo gladino ima tudi IDRIJCA, ki malo pred izlivom v Sočo sprejema Bačo.

NADIŽO loči od Soče nizko dolinsko razvodje pri Starem selu. Nadiža zavija med Matajurjem in Mijo čez državno mejo proti Beneški Sloveniji in Furlanski nižini, kjer se izgublja pod obilnimi naplavinami.

Nadiža, Idrijca, Bača in Selščica so poleti tople in prijetne za kopanje.

RASTLINSTVO

Gozd sega po pobočjih Julijskih Alp do višine 1500—1700 m, ponekod tudi 1800 m. Ob zgornji gozdni meji rastejo posamezni macesni-viharniki. Nad temi višinami sledi pas pritličnega ruševja, še više gori pa domuje bujna alpska flora, ki so zanjo značilne nizke, živo barvane in opojno duhteče cvetice. Nekatere vztrajajo prav do ločnice večnega snega, pri nas do najvišjih vrhov, kjer v skromnih razpokah kljubujejo s svojimi blazinicami silnemu vetru, pripeki in suši. V ledeni dobi se je terciarna flora umaknila v nižje lege in se tam sešla z vrstami, ki so se umikale iz Severne Evrope, nekatere celo iz Sibirije. Po dolgotrajnem prilagojevanju in medsebojnem križanju so se razvile nove vrste, ki so po umiku ledenikov spet našle zatočišče visoko v gorah. Nekaj vrst je endemičnih, to se pravi, da so znane samo iz naših gora, n. pr. Zoisova zvončica. Alpske cvetice izdatno povečujejo lepoto in zanimivost pogorja in je zato vsak turist dolžan, da jih varuje. Zelo bogato alpsko floro imajo Črna prst, Dolina Triglavskih jezer, Velo polje, Tošc, Ratitovec in Blegoš. V Trenti je alpski park »Juliana«, ki ga oskrbuje ljubljanski Prirodoslovni muzej.

JULIJSKE ALPE

Julijske Alpe se razprostirajo južno od zgornje Savske doline in Kanalske doline ter vzhodno od reke Bele in Furlanske nižine do srednje Nadiže in Staroselskega podolja. Nato jih meji Soča med Kobaridom in Tolminom. Na črti od Tolmina čez spodnjo Bačo, dolino Idrijce in mimo Žirov proti Vrhniki se tako tesno naslanjajo na Dinarsko gorstvo, da ni mogoče potegniti natančne meje med njima. Na vzhodni in jugovzhodni strani prehajajo v planote in predgorja, ki se spuščajo k Ljubljanski kotlini.

Ime »Julijske Alpe« so uporabljali že latinski pisatelji v starem veku. Ime izvira od naselja Forum Iulii, ki je stalo na kraju sedanjega Čedada in je bilo imenovano po vladarski rodbini Julijcev.

NASTANEK IN ZGRADBA GOROVJA

Do konca zemeljskega srednjega veka (mezozoika) je bilo ozemlje sedanjih Julijskih Alp dno morja Tethys. V morju so se usedali mogočni skladi apnenca, dolomita in drugih kamenin. Ob koncu kredne in v začetku terciarne periode se je začelo dno zaradi bočnega pritiska gubati in Alpe so počasi vstajale iz morja. Sredi terciara se je gubanje krepko nadaljevalo. Z juga so pritiskale na mlado gorstvo gube vstajajočega Dinarskega gorovja in so ga pomagale dvigati v velike višine. Dviganje Julijskih Alp je bilo tako silno, da so se gube marsikje prevrnile proti jugozahodu in se ponekod narinile tudi na obrobje Dinarskega gorstva. Od Savinjskih Alp jih je ločil šele kasnejši udor Ljubljanske kotline.

Kadar se je v terciaru ozemlje dvigalo, so vode rezale vanj grape in doline; kadar se je umirilo, so ga uravnavale. Najstarejši del uravnanega ozemlja, t. im. miocenski ravnik, se je ohranil v visokih planotah okrog Triglavskega vrha in v Kaninskih podih, kasnejši pontski ravnik s konca terciara pa v prostrani Pokljuki in Jelovici. O najmlajših dviganjih in mirovanjih ozemlja pa pričajo terase v dolinah Save, Soče in njunih pritokov. Končne poteze so dali Julijskim Alpam ledeniki. V ledeni dobi je vse gorovje tonilo pod debelo gmoto ledu. Po zgornji Savski in Bohinjski dolini je segal ledenik v sedanjo radovljiško okolico, po Soški dolini pa do Mosta na Soči (Sv. Lucije) in do zgornje Nadiže. Ledeniki so izbrusili krnice in koritaste doline, poglobili jezerske kotanje, pritovorili balvane in neštete morene.

Paleozojski skladi se vidijo na površju le v okolici Porezna, Blegoša in na južni strani Jelovice. Sicer so Julijske Alpe zgrajene pretežno iz triadnih plasti, spodaj iz školjkovitega apnenca, zgoraj iz glavnega dolomita in dachsteinskega apnenca, ki je sestavljen povečini iz koralnih ogrodij. Njegovi mogočni skladi sestavljajo vse visoke vrhove Julijcev, razgaljeni so v Triglavski severni steni, v Komarči in drugih stenah. Voda močno topi dachsteinski apnenec in ustvarja v njem vrtače, žlebičje, jame in podzemeljske tokove kakor na Krasu. Grebeni so divje razrezani in vrhovi drzno oblikovani. Jurski in kredni apnenci, ki tudi izvirajo iz morja Tethys, so ohranjeni predvsem na južnem obrobju gorstva, t. j. v Kobariškem Stolu in Miji, v Krnskem in Tolminskem pogorju ter v pobočjih Bovške kotline. Tu in tam ležijo krpe porfirja, priče davnega vulkanskega delovanja. Globoke doline in kotline so pokrite z ledeniškimi morenami in mladimi rečnimi naplavinami.

RAZČLENJENOST

Globoka zareza dolin Soče in Koritnice, preval Predel in dolina Ziljice delijo Julijske Alpe v vzhodni in zahodni del.

V vzhodnih Julijskih Alpah je najmogočnejše TRIGLAVSKO POGORJE. Njegova severna stran je prepadna; v njo so vrezane doline Vrata, Kot in Krma. Na vzhodu je nanj naslonjena gozdnata Pokljuka, ki strmo pada proti Bohinjki in Radovni. Na Pokljuko gre dobra cesta z Bleda. Podaljšek Pokljuke onstran Save je Jelovica, iz katere moli nad izhodom Bohinjske doline koničasti Babji zob. Onstran Radovne se dviga planotasta Mežakla. Na južni strani je Triglávski masiv manj strm in počasi prehaja v Hribarice, dolino Triglávskih jezer in Komno. Greben Velikega Špičja in Lanževice ga veže z Bohinjskim pogorjem. Triglàv sam prekaša vse sosede po višini in obliki. Vendar je tudi nad Krmo, Trento in okrog Hribaric mnogo prav veličastnih vrhov, ki so vredni obiska. Na severzahodu loči zareza Vrata—Luknja—Zadnjica Triglávsko pogorje ostro od sosednjih skupin. Pogorje je prepreženo z zaznamovanimi potmi in ima mnogo planinskih postojank.

RAZORSKA SKUPINA zavzema le prostor med Luknjo in Vršičem, a je zaradi mogočnih vrhov (poleg Razora še Prisojnik, Stenar, Križ, Pihavec in Goličica), zaradi zanimivih poti in mnogih koč zelo obiskana. Na Kriških podih so lepa Kriška jezera. Na severu veže to skupino dolina Velika Pišnica s Kranjsko goro, na jugu so hitri sestopi v Trento. Tudi ta skupina je dobro opremljena s kočami in potmi. Avtomobilska cesta Kranjska gora—Vršič (1611 m)—Bovec je samo od julija do septembra zanesljivo prehodna.

ŠKRLATIŠKA SKUPINA se dviga onstran prevala nad Kriško steno (2301) med Vrati in Veliko Pišnico. Grebeni in vrhovi so ostrih, koničastih oblik in številne stene dajejo priložnost za plezalne ture. V njenem severnem delu obkroža veličastna Martuljkova skupina amfiteatralni Martuljek, ki se spušča proti Savski dolini. Nadelanih poti je malo, koč v višinah ni, le nekaj bivakov je na razpolago plezalcem.

JALOVŠKA SKUPINA se vleče med Vršičem in Predelom. Najbolj obiskani vrh je Mala Mojstróvka. Jalovec stoji nad sklepom Planice. Mangrt, ki je najvišji vrh v tej skupini, ima na svojem grebenu državno mejo. PZS namerava speljati stezo nanj samo po naši strani. Na njegovem severnem podnožju sta na italijanski strani krasni Mangrtski jezeri. Od Jalovca se vleče na jug malo obiskani greben Pelcev, ki na vzhodu pada v Zadnjo Trento, na zahodu pa v Bavšico. V Bavškem Grintavcu se stika s skalovitim grebenom, ki spremlja desni breg Soče. Ves ta del je turistično slabo opremljen.

KRNSKO POGORJE je pomaknjeno na jugozahodni rob Julijcev in ima zelo lepe razglede. Dobro je povezano s Komno. Proti Soči je strmo odsekano. S Polóvnikom sega do kolena Soče pri Žagi, na nasprotni strani se končuje med Tolminko in Sočo pri Tolminu. Skupina ima mnogo planin, mala ledeniška jezera in je dobro prehodna.

BOHINJSKE ALI TOLMINSKE GORE se razvrščajo na zahodni in južni strani okrog Bohinjske kotline in so veličastno ozadje Tolminskega. Tod se dvigajo lahko dostopni vrhovi Bogatin, Rodica, Črna prst in drugi, znani po razgledu in flori. Na vzhodu je skupina čez Ratitovec zvezana z Jelovico, na jug pošilja manjše grebene proti Soči in Bači. Skozi pogorje gre bohinjski predor, na grebenu se križajo dobro speljane poti, koče so le nad Tolminom in na Komni, mnogo je pa planin.

Onstran Bače so že alpska predgorja. V CERKLJANSKEM HRIBOVJU je najvišji Porezen, v sosednjem ŠKOFJELOŠKEM HRIBOVJU pa Blegoš. Oba vrhova sta lahko dostopna in imata lep razgled.

Od Zahodnih Julijskih Alp pripada Jugoslaviji samo KANINSKO POGORJE, a še po njegovih vrhovih teče državna meja. Grebeni in vrhovi se dvigajo na prostranem rav-
